THEATRE CONSULTANTS

Our staff covers the full range of experience in theatre. We are designers, technicians, writers, directors, and performers. Because of this, we have a passion for and an intimate understanding of theatre, both the art form and the buildings which support it.

Theatres are complex buildings that need to accomplish many roles, both in their internal functions and within their larger communities. We understand all aspects of what it takes to run a theatre, from the form and function of the building and its technology, to its management and sustainability.

We are an independent consulting and design office only. We do not sell equipment or represent manufacturers or suppliers. Our primary goal is to provide the right solutions for the best possible price.

Our Theatre Consulting Services Include:

Theatre Planning

- Facility Planning
- Facility Programming
- Facility Design

Theatre Systems Design

- Auditorium configuration, seating and sightlines
- Functional planning
- Special area detailing
- Stage lighting
- Sound reinforcement and effects
- Audio paging and monitoring
- Production intercommunications
- Assistive listening
- Video monitoring and display
- Counterweight and motorized stage rigging
- Draperies and track
- Elevators and lifts
- Combined show controls
- Digital signage

ELGIN AND WINTER GARDEN THEATRE CENTRE ASSESSMENT

Location: Toronto, Ontario

Project Owner: Ontario Heritage Trust

Date Completed: 2009

Theatre Consultants: Novita

The Elgin and Winter Garden Theatre Centre is a National Historic Site, operated by the Ontario Heritage Trust (OHT.) Built in 1913 as a vaudeville house, it is the last operating double-decker theatre in the world. The ornate theatres were fully restored in the 1980s.

In 2009, the OHT commissioned Novita to assess the facility's theatrical systems and equipment, and make recommendations and provide cost estimates for their retention, enhancement, or replacement. Most systems and equipment in the Centre dates from the 1980s renovation.

Novita's report organized improvements according to importance, safety being the first priority. As part of our investigation, we prepared an interactive asset management database containing information such as the year the equipment was purchased, its life expectancy, safety concerns, and photos. This database was provided to the OHT in order to manage its assets through an ongoing maintenance program that was established as a result of our study. Novita also created a budget for the future capital replacement of theatrical systems and equipment.

IMPERIAL OIL CENTRE FOR THE PERFORMING ARTS

Location: Sarnia, Ontario

Project Owner: Theatre Sarnia

Date Completed: 1997

Project Cost: \$2.5 million

Architect: Maxine Shabsove
Architect

Theatre Consultants: Novita

Sarnia Little Theatre is the oldest community theatre in Ontario. For many years it operated out of production and rehearsal facilities which it owned, and performed at the Sarnia Library Theatre.

In 1994, the City took possession of the former Capitol Theatre cinema and turned it over to the Sarnia Little Theatre to renovate and return to full use as a performing arts centre whose presence would contribute to downtown revitalization. The renovation consisted of retaining and preserving the historic facade and lobbies and constructing a new 600 seat theatre in the shell of the original building. A major improvement was the addition of a 150 seat balcony.

TCU PLACE (SASKATOON CENTENNIAL AUDITORIUM)

Location: Saskatoon, Saskatchewan

Project Owner: City of Saskatoon

Date Completed: 1996, 2002, 2004

Theatre Consultants: Novita

Image credit: Saskatoon Centennial Auditorium

This 2,000 seat theatre has operated as the major touring facility for Saskatoon since its construction in 1968. Following the recommendations of a systems and equipment audit carried out by Novita in 1996, the management decided to undertake a major systems replacement program immediately. Work in the first phase included a new sound reinforcement system, new rigging and drapes, a new lighting system and major improvements to the monitoring and communications systems.

Novita's work on the facility continued with an operational analysis, condition report, capital development program plan, costing and the organization and supervision of renovation to the stage house and production systems and equipment.

CLIENT LIST

Municipal

Arts and Entertainment Centre, Milton
Burnhamthorpe Library Theatre, Mississauga
